

Specialized

Oracle Enterprise Manager 12c

HOSTED ORACLE ENTERPRISE MANAGER SERVICES

Typical Challenges Faced by Organizations

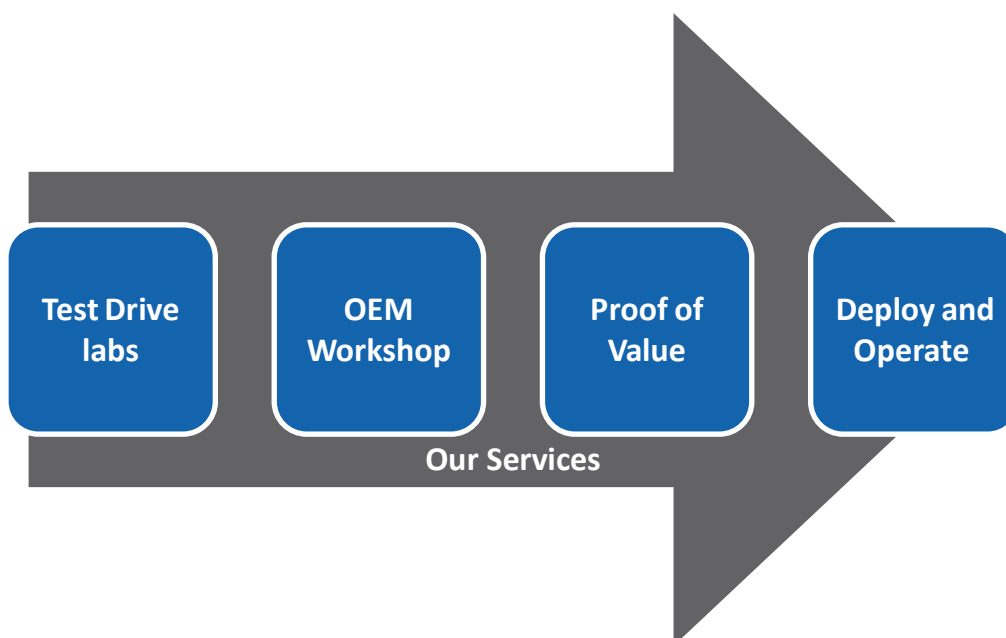

IT organizations spend significant time monitoring, maintaining and administering existing systems. These monitoring systems, like Oracle Enterprise Manager (OEM), must themselves be managed and administered.

Instead of spending time supporting and administering Oracle Enterprise Manager, IT staff can be working on improving business application's performance with effective system monitoring, problem resolution and application management. A fully managed solution can eliminate the time and

effort IT staff spend on mundane tasks such as support, administration, infrastructure management and procurement.

How Apps Associates can help:

Hosted Enterprise Manager Solutions from Apps Associates enable customers to rapidly deploy fully configured OEM12c environments in the cloud. Available in both customer self-managed, and fully managed configurations, these cloud based solutions will enable customers to focus on their core business applications and not become distracted by the need to deploy and manage enterprise management solutions.

Apps Associates services include:

- 1 Test Drive labs:** Self-service provisioning of a short term cloud instance of Oracle Enterprise Manager12c that can be launched in minutes and is fully accessible within 2 hours. We provide a detailed step by step guide that enables users to fully explore Oracle Enterprise Manager in a cloud environment. Use Cases include product evaluations and demonstrations
- 2 OEM Workshop:** We provide customized OEM12c Workshops that can be from half a day to two days in duration. We work with you to provision the relevant Oracle application targets for Oracle Enterprise Manager in the cloud. We run online, hosted training sessions for your users that provide them with a deep technical understanding of the capabilities of OEM12c.
- 3 Proof of Value:** Apps Associates will help you to assess OEM in the cloud to demonstrate the return on investment you can expect. This service includes on-demand provisioning of OEM12c in the cloud, and setup by our consultants to manage your on-premise business applications. We provide tailored support to your team while they evaluate em12c.
- 4 Deploy and Operate:** We rapidly provision Oracle Enterprise Manager 12c in the AWS cloud, leveraging hosted Enterprise Manager blueprints from Oracle. Apps Associates delivers a fully managed service for OEM12c for a fixed monthly cost. Clients bring their own license for the Oracle Enterprise Manager product, and they can manage their target applications on-premise, from this central cloud based em12c environment.

Benefits of Working with Apps Associates

- 'Go to' partner for Oracle on Amazon Web Services (AWS)
- AWS Advanced Consulting Partner with both Oracle and Managed Services competencies
- Exclusive Oracle test drive labs for a hands-on experience of Oracle applications running on Amazon Web Services
