

# Building Your Future Reporting and Analytics Platform

Available 100% remotely using best business practices for remote engagement?

Many organizations still struggle with the ability to get a complete view of their data and information in a simple and user-friendly manner. The struggle to achieve the desired goals of high levels of user adoption and user empowerment, appear to be a bridge too far for many organizations. The Apps Associates Analytics team is dedicated and focused on helping our customers achieve those goals by introducing the latest Business Intelligence and Data Management know-how and technologies available in the market today.

## The guidance you need – without the sales pitch

Through an unbiased analysis of your current Reporting, Data and Analytics business needs, Apps Associates’ Analytics Future State Analysis Workshop is designed to provide you with a roadmap tailored to your business’ specific needs and requirements. This workshop allows you to engage with Data Warehousing and Analytics experts to explore your options, including the latest in cloud and reporting tools technologies, without having to face a potential sales pitch or risk of just benefiting the vendor at the expense of your business.

The workshop will offer:

- A gap analysis of your current Data Integration and Reporting environments vs. the true needs of your business users.
- Recommendations tailored to your business needs that are based on best practices and the latest in Analytics and Data Warehousing techniques; and cloud technologies.
- Education on best approach to a scalable solution that achieves user empowerment and self-service reporting.

Our team will work with your users and IT department across your organization – to get a 360-degree view of your existing Analytics and Reporting environment and challenges. With ultra-personalized recommendations around the selection, upgrade, integration, implementation or transition process, your team will leave the workshop fully equipped with the tools you need to move forward on your journey to a more effective Business Intelligence solution.

### Workshop Deliverables

- ✓ Gap Analysis
- ✓ Latest technology recommendation and education
  - On-Prem/Cloud
  - ETL
  - DB
  - Reporting tools
- ✓ Implementation
  - Phases
  - Approach
  - Timeline
  - Cost
- ✓ Resource requirements
- ✓ Roadmap

## Skip the demos and get down to your business

Our experts will meet with your team (in person or virtually) for a total of 8 hours, over a few days in order to determine your next best steps when it comes to the future of your Analytics environment.

Regardless of whether you choose to enhance your current environment or migrate to the latest on-prem or cloud solutions or do nothing, this workshop requires no prerequisite credentials to participate and is offered on a rolling basis, so we’re there when you need us. Here’s how it works:

### Current State

- ETL/DB/Reporting tools
  - Data Sources
  - Integration
- Business needs

### Pain Points

- Current Functionality
- User adoption and Experience
- Performance and Scalability
  - Timeliness of data
- Data source integration
- Complexity of reports

### Options

- Review of ETL tools
- Review of Cloud/On-prem
- Reporting tool functionality

### Approach

- Front to back
  - Phased
- Options Review
- Change management
  - Training
  - Rollout

## What you can expect

Following the workshop, Apps Associates' experts will provide you with a roadmap for your BI and Data Management approach, based on addressing your Organization's most critical needs first. For some customers, the decision may be to migrate the entire footprint to a better performing and more cost effective solution, and Apps will recommend the best ways to achieve the most seamless migration. In other cases, the customer may decide to continue to leverage their current solution for a period of time, then the focus shifts to more efficiently running the hardware, application and tools by reducing costs and meeting the users' needs.

If a Big Bang transformation is not in your company's best interest, a phased approach to implementation will allow you to mitigate risk, while working with a focused rollout team to improve and solidify the process. We'll also take the time to discuss potential intermediate remedies, and the best support options available.

Analytics and Reporting isn't one size fits all – it's a highly sensitive, personalized choice for your company. Our Front to Back approach and early release of functionality ensure the highest levels of user adoption and the best leverage of our customer's current investments.

We offer [hybrid cloud migration](#) and [managed services](#) support, and have a strong partnership's with some of the leading Analytics and Reporting technologies and software providers. We've completed 70+ successful cloud implementations and migrations with zero downtime, so our team has your back – no matter your platform.
