

EBS Future State Analysis Workshop

Available 100% remotely as needed, using best practices for remote engagement.

Many enterprises have been hesitant about moving their business-critical applications to the cloud due to concerns around how much value they will get from the migration. Meanwhile, many EBS users believe that it would be difficult to replicate the customizations from their EBS solution in the cloud. So, how do you know if a cloud migration is the next best step for your business? Enter Apps Associates' EBS Future State Analysis Workshop.

The Guidance You Need – Without The Sales Pitch

Through an unbiased analysis of your current EBS environment and business needs, Apps Associates' EBS Future State Analysis Workshop is designed to provide you with a roadmap tailored to your business' specific needs and requirements. This workshop allows you to engage with Oracle experts, and explore multiple cloud options, without having to face a potential sales pitch or risk being sold on a new Oracle contract. Specifically, the workshop will offer:

- An assessment of your Oracle EBS footprint and expert analysis on whether a move to the cloud is right for your business,
- Recommendations tailored to your business needs on options to move to the cloud, if that is right for your business.
- Education on SaaS-based options available as alternatives to your on-premise applications

Our team will work with your IT and business end users –across Finance, HR, Supply Chain, Reporting, Sales and more– to get a 360-degree view of your existing tech environment and challenges. Our team will put together a meeting schedule that best fits your needs and work style, as this workshop can be successfully executed 100% remotely. With ultra-personalized recommendations around the upgrade, integration, implementation or transition process, your team will leave the workshop fully equipped with the tools you need to move forward on your journey to the cloud.

Workshop Deliverables

- ✓ Phasing Recommendations
- ✓ Implementation Approach
- ✓ Cloud Applications Recommendations
- ✓ Integrations Recommendations
- ✓ Reporting Recommendations
- ✓ Timeline
- ✓ Budget
- ✓ Proposal/Statement of Work
- ✓ Future State Map

Skip The Demos And Get Down To Your Business

Our Oracle experts will meet with your team in order to determine your next best step when it comes to the future of your EBS environment. Regardless of whether you choose to pursue a cloud migration or remain with your on-premise Oracle solution, this workshop requires no prerequisite credentials to participate and is offered on a rolling basis, so we're there when you need us. Here's how it works:

Introductions & Interviews

Discuss your current EBS state with our experts, including current apps/modules, integrations, reporting & more.

Receive Full Diagnostics Report

Recieve deeper understanding of the entire EBS system, using Apps proprietary diagnostics tools, Watchdog and Bloodhound.

Migration Workshop

Work with Apps' experts to prepare migration deliverables and conduct a dry run with our sponsors.

Presentations

Apps will present its findings for your business including phasing, approach, change management & more.

Focused on What Your Business Needs

Following the workshop, Apps Associates' experts will provide you with a roadmap to move to the cloud, based on addressing your organization's most critical needs first. For some customers, the decision may be to migrate the entire application's footprint to Oracle Cloud Applications, and Apps will recommend ways to approach this migration. In other cases, the customer may decide to remain on EBS for a period of time, and the focus shifts to more efficiently running the application stack and reducing costs.

If immediate cloud adoption is not in your company's best interest, a phased approach to implementation will allow you to mitigate risk, while working with a focused rollout team to improve and solidify the process. We'll also take the time to discuss potential EBS upgrades, and the best support options available with Oracle and third parties.

Cloud isn't one size fits all – it's a highly sensitive, personalized choice for your company. Whether staying on-premise, upgrading to Oracle EBS R12 or developing a coexistence strategy for Oracle SaaS, we're here to support you. We offer [hybrid cloud migration](#) and [managed services support](#), and have strong partnerships with some of the leading technology and software providers. We've completed 480+ successful cloud implementations and migrations with zero downtime, so our team has your back – no matter your cloud platform.
