

Integrated FADEL Royalty Management Solution for Oracle Cloud Financials

In today's fast moving and highly collaborative marketplace, companies across Communications, Publishing, Gaming, Tech and Media have to adapt to new business needs - licensing in content to continue to innovate and stay competitive, distributing content in new consumer-focused ways such as subscription-based models, and licensing out content to drive additional revenue streams and maximize sales opportunities. These new licensing and business models drive additional complexities for the contracted content rights, the royalty compensation models and the transparency between partners.

Managing these Royalty payments is typically a significant challenge for companies in Communications & Media sectors. Royalty management processes are often handled with inadequate offline spreadsheets, silo databases and manual processes. Without adequate tools, workforce efficiency, financial statement accuracy and internal controls all may suffer.

To address this challenge, Apps Associates and FADEL have collaborated to integrate Oracle Cloud Financials with the FADEL Royalty Management solution.

This solution extension for Oracle Cloud Financials helps streamline calculation, verification and processing of royalty payments by having a central place from which to manage the Royalty process. With a central control point to capture the Royalty process, companies can:

- Improve efficiency by eliminating manual processes and duplication of information / effort
- More accurately forecast and report royalty payments
- Improve internal controls

This solution extension for Oracle Cloud Financials helps streamline calculation, verification and processing of royalty payments by having a central place from which to manage the Royalty process.

Solution Components include:

Central registration and visibility of Royalty arrangements

Royalty payment calculations

Automation of invoice processing – both for Accounts Payable and Accounts Receivable

Flexible approval process to ensure adequate internal control

Integration to General Ledger

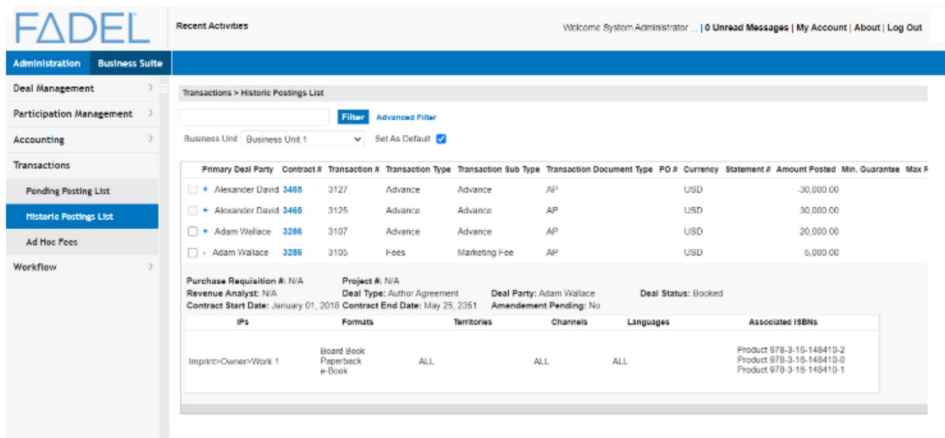

Automation of Royalty accrual journal entries

Comprehensive Royalty reporting

Whether you are a payer or receiver of Royalties, the integrated Oracle Cloud Financials Royalty solution can improve your business. If you are interested in a demo of our product, please [click here](#).
