

# Recover your Supply Chain from Covid19 with Apps Associates and Oracle Analytics Cloud

The Supply Chain processes for many organizations have been disrupted and hit the hardest by the suspension of our economy. Many of our clients are struggling to meet the ever-changing requirements of the new world we live in. Access to actionable data is imperative for the recovery, survival and success of many organizations.

Our Analytics consulting team has put together a Supply Chain revival package – “Supply Chain Intelligence” that can be implemented in as little as 2-4 weeks. The package is designed based on our many years’ of experience in providing our clients with Supply Chain solutions, as well as our current Covid19 assistance projects.

## Why Supply Chain Intelligence?

The unpredictable fluctuation of supply and demand in today’s market has made Supply Chain management a daunting task for many organizations. From the need to more accurately plan raw materials to meet requirements, to establishing alternate routes and suppliers, it all impacts customer satisfaction and retention. Access to better and faster actionable information is one of the most important ways to empower organizations to make timely and critical decisions and necessary changes.

# Benefits of Supply Chain Intelligence include

1) Insight into Key Metrics that will provide visibility into key areas of your business including:

2) Access to latest in Oracle Analytics Technology

### 3) Integration of Disparate Business Applications

A built in reporting platform integrates all the necessary data sources in order to provide a single and reliable source of information. The integration layer streamlines the data to generate the key metrics necessary to drive better and deeper insight into your supply chain sources.

#### Supply Chain Management - Source Systems

##### Demand

- Order Management
  - ◆ Bookings
  - ◆ Backlog
- Sales Forecast

##### Supply

- Procurement
  - ◆ In-Transit
  - ◆ Scheduled Receipts
  - ◆ Purchase Orders
- Manufacturing
  - ◆ Work Orders
- Supply Chain Planning
  - ◆ Planned Orders
- Inventory
  - ◆ On Hand Balances

### 4) Leverages Oracle Analytics Cloud Rapid Deployment

#### Get More Value Faster

Oracle's rapid deployment and ease of use delivers a substantial Return on Investment. Oracle Analytics Cloud Data Visualization is the new interface used by analysts and data scientists for data preparation, data model creation, machine learning, and more. Your users can now connect to multiple data sources, including Oracle Essbase cubes, and they can also import their own data in one click.

# Get the Apps Associates Supply Chain Intelligence solution, built on Oracle Analytics Cloud Today

Let us help you get the power of your data at a lower entry cost that will provide immediate insight into your Supply Chain process.

## Pricing

The total cost for the deployment and implementation will be available in a few package variations as follows.

### Foundation Level: \$45,000 (Duration 2-4 weeks)

- o Data Pipelines to extract data from Oracle Cloud Applications using Oracle provided Public View Objects
- o Loading the extracted data into Autonomous Data Warehouse
- o Curated data that you can report using Data Visualization

### Integration Level: \$40,000 (Duration 2-4 weeks)

- o Transform and load data in Oracle's Autonomous Data Warehouse
- o Execution of Full & Incremental load processes
- o Deploy other Subject Areas for the identified business areas
  - ✓ Sales Orders
  - ✓ Purchase Orders
  - ✓ Requisitions
  - ✓ Work Orders
  - ✓ Forecast
  - ✓ Planned Orders
  - ✓ Inventory

### Analytics & Reporting: \$20,000 - 60,000 (Duration 4-6 weeks)

- o Dashboards and the corresponding reports created using Oracle Analytics Cloud: Including the capability to drill down into the transactional details

**Note:** Initial pricing based on our past experience with similar projects. The client's specific requirements will determine the final cost. Also this is a sequenced approach, you must finish each level before moving on to the next level.
