Yes to Oracle on AWS

There is a major shift happening in the **IT** world from on-premise to outsourced hosted ERP and it is only just beginning. Whether you're running Oracle ERP applications, such as Oracle E-Business Suite, or other Oracle applications including OBIEE and Hyperion, moving to Amazon Web Services ("AWS") Cloud will reduce costs and increase efficiency.

We know you've invested years in developing and customizing Oracle applications to scale the back-office operations of your business. We know navigating questions such as support, performance and license compliance has added another dimension to your business case, and understand that your forecasted savings and efficiency gains have to offset the uncertainty and perceived risk. That's why we're here to help.

Yes, You Can

Successful cloud migrations, with documented security, compliance and savings outcomes, paved the path for accelerating rates of adoption. As the pace picks up to move from traditional on-premise infrastructure, the question we're asked repeatedly is whether Oracle legacy applications can be migrated and run on AWS. The simple and direct answer is "yes, you can."

*We feel much better being on AWS,
with Apps support behind us...
We don't have to worry about all the craziness.
Now we can focus on our business.*

- Balazs Franciszti, Sr. Director of Digital Technology at Munchkin

Why AWS?

Lower Total Cost of Ownership (TCO)

Documented Security & Compliance

Increased Efficiency

Ability to Scale Up, or Out

Flexibility & Agility

Why Apps Associates?

AWS' extensive portfolio of services requires expertise to implement. Every member of our cloud services team is required to have AWS accreditation and certification, and multi-dimensional experience. You want to work with a partner that understands the full range of complexity when undertaking the planning, migrating, implementing, integrating, adopting, and managing multiple business apps in the Cloud—that's us. We create scalable client centric solutions that translates into immediate business impact for you.

Apps Associates has successfully moved 350+ Oracle workloads to AWS. We have the skilled, certified resources and an integrated toolset from technology providers that can also help ensure the transition is done safely and the migration is as smooth as possible. Once migrated to AWS, we will ensure your infrastructure and applications are fully managed, so you can focus on accelerating growth within your business.

" *We were looking for a partner that knew the AWS landscape and ecosystem. Having Apps Associates by our side meant we would have a partner with expertise and the certifications to prove it. Having their SOC 1 certification was definitely an attractive point.* "

- Mark Aubin, Chief Innovation Officer - NA, Aptitude Software Inc.
