

Building Your Future State E-Business Suite Environment

Available 100% remotely as needed, using best practices for remote engagement.

Not sure if a move to Oracle Cloud Applications is right for you? Many enterprises have been hesitant about moving their business-critical applications to Oracle Cloud Applications due to concerns around how much time and process transformation will be involved. In addition, many E-Business Suite (EBS) users believe that it would be difficult to replicate the customizations from their EBS solution in Oracle Cloud Applications. So, what are your choices if you don't want to make the move to Oracle Cloud Applications right now? How can you reduce cost and increase efficiency with what you have and determine the next best step for your business? Enter Apps Associates' [EBS Future State Analysis Workshop](#).

The Guidance You Need – Without the Sales Pitch

Through an unbiased analysis of your current EBS environment and business needs, Apps Associates' EBS Future State Analysis Workshop is designed to provide you with a roadmap tailored to your business' specific needs and requirements. This workshop allows you to engage with Oracle experts, and explore multiple options, without feeling pressured to adopt an immediate move to Oracle Cloud Applications. Specifically, the workshop will offer:

- An assessment of your Oracle EBS footprint and expert analysis on changes to functionality needed within EBS
- Recommendations tailored to your business needs to upgrade to R12.2.x, if that is right for your business.
- Review options available to migrate to the public cloud. Gain a better understanding of all customizations to your EBS environment by running our diagnostic tooling, Bloodhound.

Workshop Deliverables

- ✓ Bloodhound output
- ✓ Current state assessment
- ✓ Future state recommendations
- ✓ Budget and timeline for implementation recommendations

Our team will work with your business and system users –across Finance, HR, Supply Chain, Reporting, Sales and more – to get a 360-degree view of your existing tech environment and challenges. With ultra-personalized recommendations around the possible upgrade, integration, or cloud migration process, your team will leave the workshop fully equipped with the tools you need to maximize the investment in your EBS environment.

Focus on Improving Your EBS Investment

Regardless of how you decide to move forward, this workshop requires no prerequisite credentials to participate and is offered on a rolling basis, so we're there when you need us.

Here's how it works:

Introductions & Interviews

Discuss your current EBS state with our experts, including current apps/modules, integrations, reporting & more.

Receive Full Diagnostics Report

Receive deeper understanding of the entire EBS system, using Apps proprietary diagnostics tools, Watchdog and Bloodhound.

Assessment Workshop

Work with Apps to assess current environment and review recommendations for optimization.

Presentations

Apps will present its findings for your business including phasing, approach, change management & more.

What You Can Expect

Following the workshop, Apps Associates' experts will provide you with a roadmap to move forward with your EBS installation, based on addressing your Organization's most critical needs first. We will help you decide how to prioritize the recommendations to more efficiently run the application stack and potentially reduce costs.

A phased approach to implementation will allow you to mitigate risk, while working with a focused rollout team to improve and solidify the process. We'll also take the time to discuss potential EBS upgrades, and the best support options available with Oracle and third parties.

Optimizing EBS isn't one size fits all – it's a highly sensitive, personalized choice for your company. Whether staying on-premise, upgrading to Oracle EBS R12.2.x or developing a coexistence strategy for Oracle SaaS, we're here to support you. We offer [on premise](#), hybrid cloud migration and [managed services](#) support, and can guide your team through migration to a public cloud provider. We've completed 400+ successful public cloud migrations with zero downtime, so our team has your back.
