

Unify Business Processes and Enable Data Flow with ERP and Apps Associates

As companies look to simplify their application stack and reduce the cost of ownership, SaaS-based applications are on the rise – especially with new emphasis on enabling remote workforce capabilities. SaaS Enterprise Resource Planning (ERP) applications provide comparable functionality to traditional on-premise ERP applications, however moving ERP systems to the cloud expedites and improves accuracy and access to that data. With the help of Apps Associates’ experts, start leveraging SaaS tools to unify business processes and improve data flow from one part of the organization to another.

Key Benefits

Migrating to [Oracle ERP Cloud](#) is bringing business into the modern era and keeping processes on the cutting edge of today’s industry best practices. With real-time access to live data, business processes will be improved for the long-run to realize things like: enhanced accuracy and control over decision making, improved cash management, easier compliance with industry requirements and quarterly enhancements from Oracle.

In migrating data to Oracle ERP, decision makers gain a feature-rich SaaS application hosted in the Oracle Cloud, covering:

- Core Financials
