

Robotic Process Automation

How RPA Can Help Your Organization

Robotic Process Automation, or RPA, is the outsourcing of repetitive tasks and sequences to a robot-in-training, that helps transform businesses by using automation to evolve with speed and accuracy. The nice thing is that the software bot is always working for your organization, it doesn't need sleep and it doesn't make mistakes. Bottom-line, you can take the mundane, repetitive, time consuming and computer based tasks off your employees' plates giving them extra hours in their day for higher value more meaningful work.

RPA Benefits:

RPA is a path to streamline an array of routine business tasks. When your organization utilizes RPA for high volume, stable, repeatable tasks that have specific inputs and outputs, your organization can reap solid ROI. Organizations like RPA because it can help them improve productivity across a wide range of constituents including users, customers and employees. With RPA you can build flexibility, agility and adaptability and cost efficiency into your processes. In addition, it provides your organization ability to scale and even improve service levels and frees your employees to work on higher impact activities.

Apps RPA Service Offering:

At Apps Associates, our RPA Service offerings can be categorized into three sections:

 Build	 Maintain	 Enhance
---	--	--

Benefits

- ✓ Avoid human errors and reduce human efforts
- ✓ Save time and improve productivity, accuracy, and consistency
- ✓ Enhance business analytics and allow for easy standardization of workflows
- ✓ Provides a frictionless delivery of tasks
- ✓ Complete their audit trail for compliance purpose
- ✓ Reduce costs

Our Build offering is mainly focused on Bot development activities. With our Maintain offering, you can avail of our 24x7 Monitoring/Response Action features and with Enhance, we can review your existing Bots, recommend improvements and make those improvements for you. Our offerings can be availed of separately or in combination.

Further, while we are system agnostic, you can also leverage our vast knowledge of Oracle Applications Cloud/On premise systems/modules, our Salesforce knowledge and our AWS/Analytical skill set to improve your business processes while implementing RPA.

Leading Industries utilizing RPA

 Financial Services	 Business Process Outsourcing	 Manufacturing
 Utility	 Legal	

What processes are best suited for RPA?

Rule Based Process: Rule-based processes are those where a series of simple “If...then” logic can be applied without involving any human decision.

Stable Process: Processes which have been performed in the same way for a period not less than 6 months. Also, no frequent changes are expected in the process in the near future.

Standard Inputs: Standard inputs are the ones where the system knows where to get it from. For example, a document with data stored in a predefined format, unlike hand written documents or images.

Repetitive Manual Process: Its ideal to select repetitive manual process for automation to gain FTE reduction cost benefit. Every day a user performs a series of tasks in the system that are tedious and not require any human decision making.

High Volume: Processes that have a large volume of records/transactions enable a better return on investment for automation.

Sample Business Processes

- ✓ Manual data entry
- ✓ Read/Write data from any Application or File to any Application or File
- ✓ Uploading and downloading of files to/from ftp servers
- ✓ Interacting with databases
- ✓ Data scraping
- ✓ Sending email notifications
- ✓ Screen recording
- ✓ Reading csv files from local machines
- ✓ Perform credentials masking
- ✓ Integration using web services
