

# Assessing NetSuite as a Long Term ERP Solution

Available 100% remotely as needed, using best practices for remote engagement.

Not sure if NetSuite will continue to address company growth and strategic direction? Many companies are wondering whether NetSuite will continue to support changing product and service direction, as well as global expansion as the company grows. After the Oracle acquisition of NetSuite, companies find that there are more options for ERP systems under the Oracle brand. Oracle Cloud Applications offer a complete suite of modules designed to support larger, global companies as their business systems needs expand. But many NetSuite customers aren't familiar with Oracle Cloud Applications and don't want to enter a sales process for a new ERP system without understanding the differences between the two systems. Interested in comparing your current state NetSuite install with what Oracle Cloud Applications can provide? Enter Apps Associates' NetSuite vs. Oracle Cloud Applications Workshop.

## The Expert Guidance You Need

Through an unbiased analysis of your current environment and business needs, Apps Associates' NetSuite vs. Oracle Cloud Applications Workshop is designed to provide you with an assessment of your current NetSuite functionality and future company direction while determining whether Oracle Cloud Applications would be a better fit for your company. This workshop allows you to engage with Oracle experts, and explore multiple options, without feeling pressured to adopt an immediate move to Oracle Cloud Applications. Specifically, the workshop will offer:

### Workshop Deliverables

- ✓ Current state assessment
- ✓ Future state recommendations
- ✓ Budget and timeline for implementation recommendations

- An assessment of your current business systems footprint, and expert analysis on changes to functionality needed within that system
- Recommendations tailored to your business needs to enhance your current NetSuite solution to support a company's strategic direction
- An evaluation of the Oracle Cloud Applications fit for your business systems needs, including a demo of the product and a deep dive into key areas of functionality

Our team will work with your business and system users –across Finance, HR, Supply Chain, Reporting, Sales and more – to get a 360-degree view of your existing business systems and current challenges. With ultra-personalized recommendations around the possible enhancement, integration, or migration to Oracle Cloud Applications, your team will leave the workshop fully equipped with the tools you need to maximize the investment in your current system's environment.

## Focus on Improving Your Business Systems Investment

Regardless of how you decide to move forward, this workshop requires no prerequisite credentials to participate and is offered on a rolling basis, so we're there when you need us.

Here's how it works:

### Introductions & Interviews

Discuss your current NetSuite state with our experts, including current apps/modules, integrations, reporting & more.

### Assessment Workshop

Work with Apps to review recommendations for optimization or migration to Oracle Cloud Applications.

### Presentations

Apps will present its findings for your business including phasing, approach, change management & more.

## What You Can Expect

Following the workshop, Apps Associates' experts will provide you with a roadmap to move forward based on addressing your organization's most critical needs first. We will help you decide how to prioritize the recommendations to more efficiently support your business processes and potentially reduce costs.

A phased approach to implementation will allow you to mitigate risk, while working with a focused rollout team to improve and solidify the process. We'll also take the time to discuss potential upgrades, and the best support options available with your current on premise system and third parties.

Optimizing existing business systems isn't one size fits all – it's a highly sensitive, personalized choice for your company. Whether staying on NetSuite, adding on EPM or HCM functionality, or performing a full migration to Oracle Cloud Applications, we're here to support you.
