

Setting the Stage for Growth

Optimizing Your Supply Chain Systems for Life Sciences

Our Advisory Services for Supply Chain Optimization has been developed to help customers improve the performance of their organization and their supply chain management systems. If you are a life science organization that is just starting, or looking to scale your operations for the next phase and need a competitive advantage, Apps Associates can help.

Your focus is on disrupting the industry by creating innovative drugs and/or treatments. Transitioning from clinical trials to commercialization comes with its hosts of challenges. Our goal is to help clients like you unlock business value and harness the power of technology. Being your strategic partner is where we excel. If you feel like you are “building the plane as you fly it”, rest assured - Apps Associates can provide the strategic supply chain management system roadmap that will ensure a smooth landing.

Our advisory engagements utilize best practices, drawn from experiences with other Apps Associates clients, industry trends, and thought leadership to produce a SCM system strategy that will provide you with an edge over your competition. When we engage with our clients, we work cross-functionally to create strategies that align with business objectives. Our strategy sessions are inclusive and collaborative with members from across your organization. Our experts specialize in identifying operational and system interdependencies, and suggesting the needed technology to address upstream product supply and downstream trade and distribution concerns. This creates a “Win/Win” for all areas of your organization.

Apps Associates focuses on people, process and technology when facilitating strategy sessions with our clients. Our approach to your SCM optimization roadmap strategy takes into consideration six major areas outlined below:

Insource / Outsource and Possible Suppliers

Interdependencies (System, Operational and Process considerations)

Master Data Considerations (Overall data strategy, governance, high level data elements)

Integrations

Timing and Cost

Project sequencing

These areas allow us to develop a comprehensive SCM Strategy that accounts for all areas of the life science supply chain, including sourcing, manufacturing, distribution, and delivery .
